Valve Box Stabilizer

VBS-U

VBS helps eliminate settling and shifting often occurring when a valve box is installed without an anchoring device. Install the saddle type Valve Box Stabilizer over each valve to position the valve nut in the center of the valve box. Molded in stabilizing fins, integral to the design, prevent valve box movement in the ground.

Made of durable, black polycarbonate material Valve Box Stabilizer is light-weight yet durable. Valve Box Stabilizer makes your construction or repairs last for years. VBS-U fits most all valves 4" – 12".

SPECIFICATION FOR VALVE BOX STABILIZER

Install a saddle type Valve Box Stabilizer (VBS) over each valve to position the valve nut in the center of the valve box. The VBS shall be fabricated of high impact polycarbonate as manufactured by M&E Components Inc. for Assured Flow Sales, Inc. or approved equal.
